

## *We Are On Your Team*

Not only is this our slogan, but the way we have done business for the last fifteen years.

It takes a team of people working together to make any project successful and it is always our goal to be a productive part of that team.

Many times, the work done by JCM ECI is completed at the very beginning of a project and we don't get the opportunity to stay involved throughout the life of the project. However, keeping us involved from start to finish can greatly improve the success of the project. This has been demonstrated on many projects, including: The Peninsula, Millville Southtown, Oak Creek, SR1 and others.

As such, JCM ECI is announcing a new twist on our existing service menu. You can now request that JCM ECI be involved as part of the development team and stay involved throughout the process. Our varied experience and fresh perspectives can assist the rest of the team in many ways, for example:

- *Providing input during site planning and design*
- *Assisting with feasibility studies and alternatives analysis*
- *Identifying alternatives to permitting*
- *Suggesting environmentally sensitive design options*
- *Anticipating and addressing regulatory concerns*
- *Providing testimony at government meetings and hearings*
- *Coordinating with lenders through Phase I Audits and follow up*
- *Adding credibility to the environmental commitment of the developer*
- *Helping to coordinate other subcontractors and reports (ie. Archaeology, Landscape Architect, etc.)*
- *Assisting with BMP designs and alternatives*
- *Providing permit compliance and CCR reviews*

So when you see our new slogan remember that we are (and always have been) on your team and we look forward to being more involved and helping to make your projects more successful. Feel free to call us to discuss the team approach further and to let us show you how we can help.
